Een flipped classroom biochemie

Een experiment met bio-ingenieurs en biologen

Waarom blenden?

Doelstellingen

- Versterken betrokkenheid bij leerproces.
- Initiatie / kennismaking met Engelstalig handboek.
- Verwerven detailinhoud (kennen / begrijpen) geselecteerde topic.
- Extra tijd voor bespreking, vragen, oefenen, verdieping.

Welke ingrediënten?

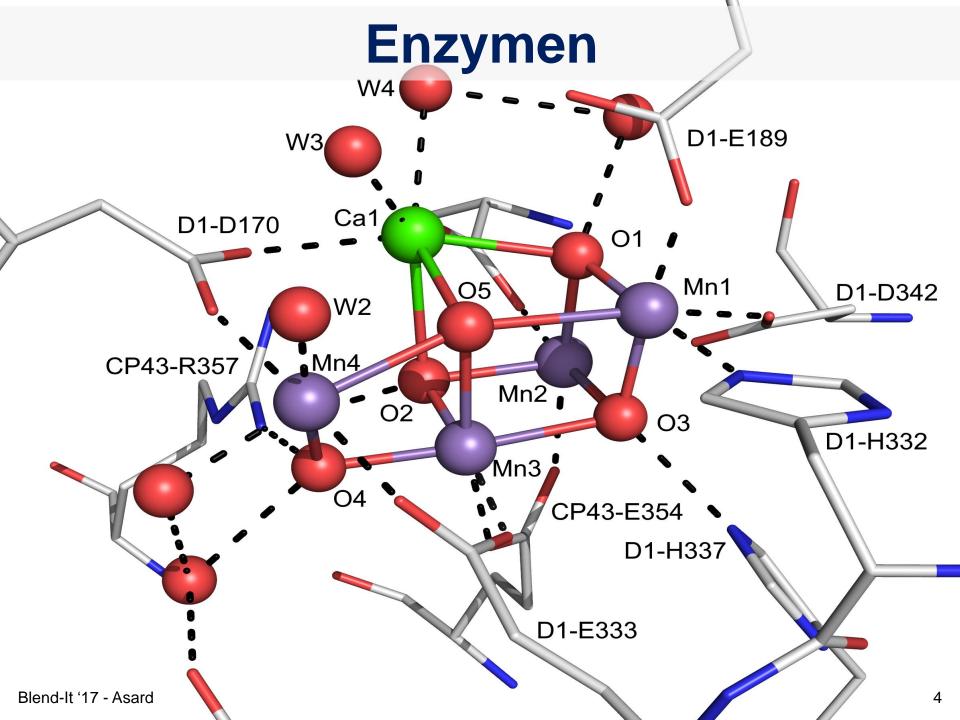

- Hoorcollege: oefeningen, discussie, reflectie, vraagstukken.
- Flipped classroom (self-learning) + discussie, kennisverdieping.
- Integratie online leeromgeving.
- Integratie online biochemie tools.
- Verbinding actualiteit, doorbraken en impact.

Welke proefkonijnen?

- OO Biochemie, bachelor 2
- Bio-ingenieurswetenschappen (63), Biologie (52)

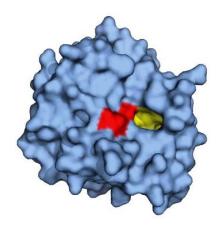

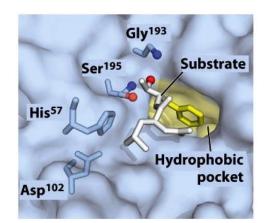

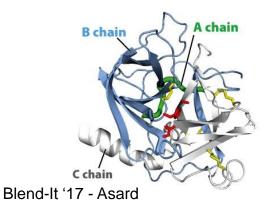

6.4 Voorbeelden van enzymatische reacties

Het reactiemechanisme van chymotrypsine omvat acylering en deacylering van een Ser residu

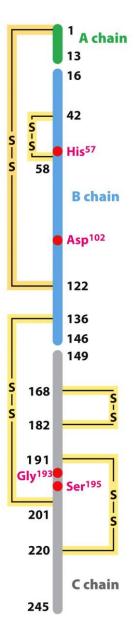

- Chymotrypsine: serine protease, Mwt 25,191 Da
- Specifiek voor peptidebinding naast Trp, Tyr, Phe
- 3 polypeptiden, S-S bruggen
- Zuur-base katalyse en covalente katalyse
- Katalytische site met katalytische triade (His⁵⁷, Asp¹⁰², Ser¹⁹⁵)
- Hydrofobe pocket

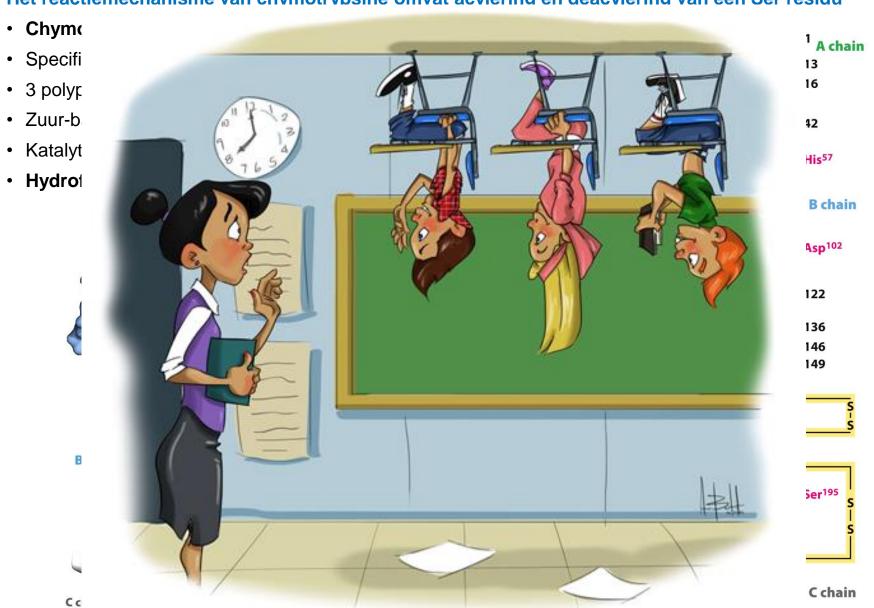

6.4 Voorbeelden van enzymatische reacties

Blend-It '17 - Asard

Het reactiemechanisme van chymotrypsine omvat acylering en deacylering van een Ser residu

6

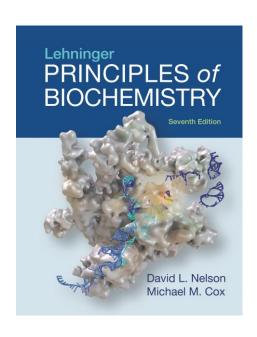

De opdracht

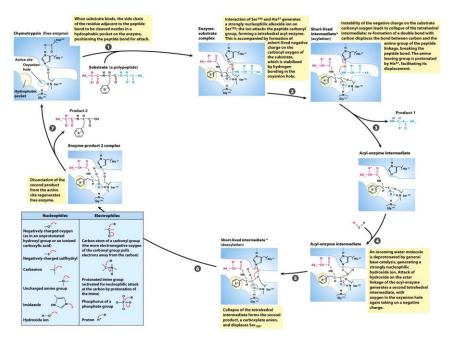

Leerdoelstelling

• "Je kan de werking van enzymen uitleggen, op niveau van de aard van de reactie (hydrolyse, fosforylering, ...), het reactiemechanisme; in relatie tot de structuur, thermodynamica, en intermoleculaire krachten."

Topic: reactiemechanisme chemotrypsine

- Toewijzen tekstboek onderdeel.
- Toelichting bij lezen, leesmethodiek.

De timing

Lesschema 2016-17

THE BIOLOGY PROJECT + BIOCHEMISTRY

Energy, Enzymes, and Catalysis Problem Set

Energy transformations are central to all living organisms. The purpose of this problem set is to become more familiar with some key principles about enzymes, catalysis, and energy that are central to a subsequent study of metabolic pathways.

Instructions: The following problems have multiple choice answers. Correct answers are reinforced with a brief explanation. Incorrect answers are linked to tutorials to help solve the problem.

- 1. Features of enzyme catalyzed reactions
- 2. Equilibrium constant for sucrose hydrolysis
- 3. Kinetics of an allosteric enzyme
- 4. An energy barrier separating reactions and products in a chemical reaction
- 5. Why do enzymes reach a maximum rate at high substrate concentration?
- 6. Equilibrium constant for ionization of acetic acid
- 7. Describing the reaction rate for a chemical reaction
- 8. Features of an exergonic reaction
- 9. Kinetics of an enzyme reaction with a non-competitive inhibitor
- 10. Enzyme features
- 11. Understanding activation energy
- 12. Energy requiring reactions in biological systems
- 13. Equilibrium constant for hydrolysis of glucose-6-phosphate
- 14. Interpreting an "S-shaped" enzyme kinetics curve
- 15. Interpreting the plateau of an enzyme kinetics curve
- 16. Energy requiring and energy yielding reactions

BEGIN PROBLEM SET

Hoe is het blenden uitgedraaid?

Doelstellingen bereikt?

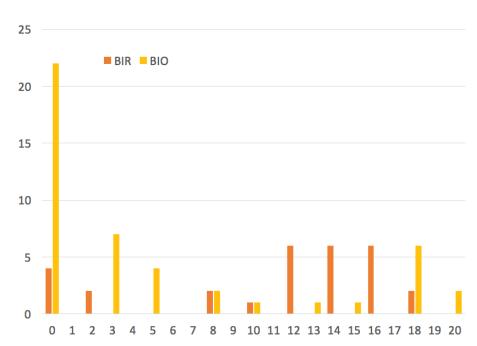

Versterken betrokkenheid bij leerproces.

1

- Initiatie / kennismaking met Engelstalig handboek.
- Verwerven detailinhoud (kennen / begrijpen) geselecteerde topic. 🗸
- Extra tijd voor bespreking, vragen, oefenen, verdieping.

Examenresultaten

	BIR	BIO
Inschr.	63	52
Deelname	57	46
Enzym-vraag	29	46
Blanco	4	22
Geslaagd	21 (72%)	11 (23%)

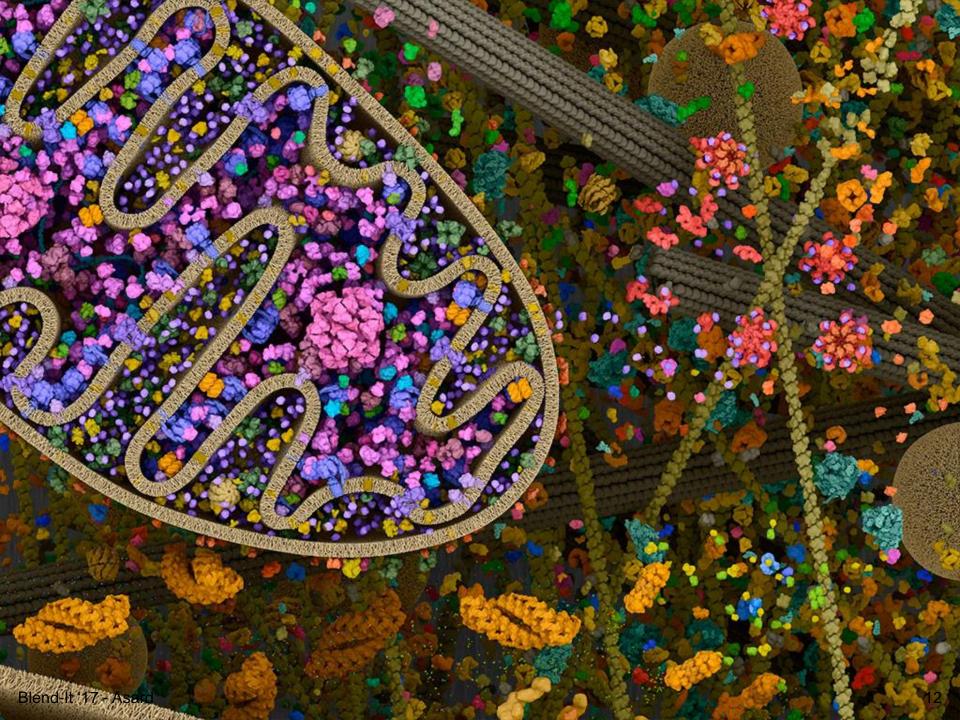

Hoe is het blenden uitgedraaid ... voor de lesgever?

Pro's & con's?

- Veel werk bij opzet en lesvoorbereiding.
- Geschiktheid onderwerpen.
- Verhoogde participatie.
- Grotere diepgang kennis.
- Verhoogd lesplezier.

WHAT'S NEW?
